

ROSHAN MOAZED

Brookline, MA | moazed.r@northeastern.edu | (617) 639-6340

EDUCATION

Northeastern University, Boston, MA — M.S. Applied Mathematics (Expected May 2027)

University of Massachusetts Boston — B.S. Applied Mathematics, Magna Cum Laude (May 2023)

Brown University — B.A. Creative Writing, Honors (May 2017)

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Excel, VBA, Git, Jupyter, Streamlit

ML / Data Science: XGBoost, scikit-learn, TensorFlow, Forecasting, NLP, Recommendation Systems, Computer Vision

Libraries: pandas, NumPy, SciPy, Matplotlib, Plotly

Analytics: Feature Engineering, Model Evaluation, KPI Reporting, Dashboards, A/B Testing Concepts

Other: Tableau, Power BI, Pinecone, OpenAI API, ArcGIS Pro

EXPERIENCE

Conservation Resources — Data Analyst | Exeter, NH | Aug 2023 – Jan 2026

- Designed and presented monthly and quarterly financial reports using SQL, Excel, and VBA for leadership and investors.
- Built predictive models for agricultural portfolio performance, crop yield forecasting, and asset allocation optimization.
- Developed ML models (linear regression, logistic regression, random forest) forecasting apple orchard yields with ~83% predictive accuracy.
- Used SciPy to build efficient frontiers and optimize agricultural commodity portfolios using historical market data.
- Built internal chatbot by connecting SQL databases to Pinecone vector search, improving data access for non-technical users.
- Calculated annual CO2 emissions and sequestration across 20+ managed properties and analyzed year-over-year changes.
- Performed geospatial analysis in ArcGIS Pro and maintained investor mapping data rooms across property portfolio.

AI Lean — Customer Satisfaction Analyst | Boston, MA | Dec 2022 – Jun 2023

- Built dashboards and reports on customer service performance and satisfaction across multiple datasets.
 - Reduced average ticket response time by 47% and resolution time by 54% through workflow analytics.
 - Generated executive reporting on KPIs, customer satisfaction, and internal performance metrics.
 - Managed 100+ customer tickets simultaneously while monitoring Zendesk SLA compliance.
-

PROJECTS

Retail Demand Forecasting & Inventory Optimization

- Built XGBoost forecasting platform using Favorita grocery sales data across multiple product families.
- Engineered lag, rolling-window, calendar, and business-driver features to outperform naive baselines.
- Deployed Streamlit dashboard with inventory simulation, stock recommendations, and scenario planning.

Ecommerce Recommender System

- Built collaborative filtering recommendation engine improving Hit Rate@10 by ~4.3x over baseline methods.
- Deployed interactive recommendation dashboard in Streamlit.

Brain Hemorrhage Segmentation & Classification

- Built multi-view U-Net style deep learning pipeline for medical image segmentation and deployment workflow.
